

Quality Policy

Apal Agricultural Laboratory

Apal Agricultural Laboratory is a privately owned, innovative, independent laboratory providing soil, plant and water analytical services to the agricultural industry. The data provides the base for agronomists, consultants and farmers to manage crop nutrition and soil health solutions. Apal's superior service is due to a team of dedicated, highly trained and skilled staff who are all proud and share in the company's passion for supporting the Agricultural industry to be productive, sustainable, environmentally mindful and profitable. The quality of our work and our commitment to building strong client relationships aims to create a good reputation within the industry.

To align with the organisational goals of the Apal Agricultural Laboratory, the Laboratory has established, maintained and is committed to a quality management system in accordance with AS ISO/IEC 17025. General Requirements for the competence of testing and calibration laboratories.

The quality management system has been developed to ensure that Apal Agricultural Laboratory:

- adopts and maintains good laboratory practice
- meets the needs and expectations of the agricultural industries
- strives for continuous improvements and innovation in methods and processes
- ensures compliance with relevant standards and statutory and regulatory requirements
- continually evaluates, reviews and improves the effectiveness of the management system
- complies with Standard Operation Procedures (SOP) and the WH&S practices of the APAL Agricultural Laboratory.
- Maintains a reputation of honesty, integrity, quality and capability

To meet the above objectives, the staff at Apal Agricultural Laboratory are customer-focused and committed to pursuing best practice.

Compliance with this Quality Policy is fundamental to all operational activities of Apal Agricultural Laboratory. Staff in this Laboratory are required to support and be committed to this Quality Policy, familiarise themselves with the Quality Documentation, implement the policies and procedures in their work and have an understanding of the relevance and importance of their activities and contribution to the achievement of the objectives of the Quality System.
